#### Half Yearly Compliance Report 2024 01 Jun(01 Oct - 31 Mar)

#### Acknowledgment

Proposal Name	Expansion of Integrated Steel Plant at Siltara Growth Centre, Siltara,Raipur Chhattisgarh by Jayaswal Neco Industries Limited (Formerly Known as Corporate Ispat Alloys Limited
Name of Entity / Corporate Office	Susanta Kumar Moitra
Village(s)	N/A
District	RAIPUR

Proposal No.	IA/CG/IND/19867/2009
Plot / Survey / Khasra No.	N/A
State	CHHATTISGARH
MoEF File No.	J-11011/1058/2007- IA.II(I)

Category	Industrial Projects - 1
Sub-District	N/A
Entity's PAN	NA
Entity name as per PAN	NA

### **Compliance Reporting Details**

**Reporting Year** 2024

Presently plant is not in

Remarks (if any) operation. Construction

work for expansion units are yet to be started.

**Reporting Period** 01 Jun(01 Oct - 31 Mar)

# **Details of Production and Project Area**

Name of Entity / Corporate Office

Susanta Kumar Moitra

	Project Area as per EC Granted	Annual Project Area in Possession
Private	0	0
Revenue Land	0	0
Forest	0	0
Others	71.22	51.0
Total	71.22	51

### **Production Capacity**

Sr. no	Product Name	units	Valid Upto	Capacity	Production last year	Capacity as per CTO
1	Sinter Plant	Million Tons per Annum (MTPA)	N/A	1.20	0	0
2	Blast Furnace	Million Tons per Annum (MTPA)	N/A	0.8	0	0
3	Coke Oven Non RecoveryType	Million Tons per Annum (MTPA)	N/A	0.3	0	0
4	Oxygen Plant	Tons per Day (TPD)	31/05/2026	300	0	100
5	Captive Power Plant	MW	01/05/0001	57	0	0
6	DRI Plant	Million Tons per Annum (MTPA)	01/01/0001	0.15	0	0
7	Steel Melting Shop	Million Tons per Annum (MTPA)	31/05/2026	1.2	0	0.40
8	Rolling Mill	Million Tons per Annum (MTPA)	31/05/2026	0.9	0	0.3

## Conditions

# **Specific Conditions**

Sr.No.	Condition Type	Condition Details		
1	WATER QUALITY MONITORING AND PRESERVATION	Total water requirement of the water from river kharoon shall not exceed 380.50 m3/h. rolling mill overflow shall be taken to settling tank for removal of scales. All the waste water shall be treated in effluent treatment plant(ETP) and treated waste water including cooling tower blow down shall be used for dust suppression, sinter nodulizing ,slag quenching, ash handling, green belt development and various other project related activities. Zero discharge shall be adopted.		
	•	k for expansion units are yet to be started. presently not in	Date: 31/05/2024	
2	Statutory compliance	No coal based sponge iron plant and captive power installed without prior permission from state Govt. of (banned as per the order of the Govt. of Chhattisgarh	Chhattisgarh	

Date: **PPs Submission:** Agreed to Comply 31/05/2024 Noted. Efforts shall be made to reduce RSPM levels in the ambient air and a time bound action plan shall be submitted. On line ambient air quality monitoring and continuous stack monitoring facilities for all the stacks and sufficient air pollution control devices shall be AIR QUALITY provided to keep the emission levels below 100 mg/Nm3.At no time 3 MONITORING AND the emission level shall go beyond the prescribed standards. **PRESERVATION** Interlocking facilities shall be provided so that process can be automatically stopped in case emission level exceeds the limit. Data on ambient air quality stack emissions and fugitive emissions shall be regularly submitted to this ministry including its regional office at Bhopal and the CECB/CPCB once in six months. Date: **PPs Submission:** Agreed to Comply 31/05/2024 Construction work for expansion units are yet to be started. Plant is not in operation. However manual Ambient air quality monitoring report is attached as Annexure -I All the standards prescribe for the coke oven shall be followed as **ENERGY PRESERVATION** per the latest guidelines. Proper and full utilization of coke oven 4 **MEASURES** gases in power plant using waste heat recovery system shall be ensured and no flue gases shall be discharged into air. **PPs Submission:** Agreed to Comply Date: All the standards prescribe for the coke oven shall be followed as per the latest guidelines. Proper 31/05/2024 and full utilization of coke oven gases in power plant using waste heat recovery system shall be ensured and no flue gases shall be discharged into air. Gaseous emission levels including secondary fugitive emissions from Blast furnace and sinter plant shall be controlled within the latest permissible limits issued by the Ministry and regularly 5 Statutory compliance monitored. Guidelines /code of practice issued by the CPCB shall be followed. The emission standards issued by the Ministry in May, 2008 for the sponge plants shall be followed. Date: **PPs Submission:** Agreed to Comply 31/05/2024 Noted for compliance. Construction work for expansion units are yet to be started. Vehicular pollution due to transportation of raw materials and finished product shall be controlled. Proper arrangements shall also be made to control dust emissions during loading and unloading of the raw materials and finished product. Efforts shall be made to AIR QUALITY reduce the impact of transport of the raw materials and end products MONITORING AND 6 **PRESERVATION** on the surroundings environment including agriculture land. All the raw material including fly ash shall be transported in the closed containers only and shall not be overloaded. Vehicular emissions shall be regularly monitored and records kept. Date: **PPs Submission:** Agreed to Comply 31/05/2024 Noted for compliance. Construction work for expansion units are yet to be started. Plat is not in operation. Electronic precipitator (ESP) shall be provided to AFBC boilers, DRI Kiln, coke oven and sinter plant to control air emissions below **AIR QUALITY** 100 mg/Nm3.gas cleaning plant having dust catcher and pulse jet bag 7 MONITORING AND shall be provided to blast furnace (BF). Stacks of adequate height as **PRESERVATION** per CPCB guidelines shall be provided to control emissions from the blast furnace (BF), sinter Plant, Coke oven, Steel melting

			Date:
	<b>Submission:</b> Agreed to Comply for compliance. Construction work	for expansion units are yet to be started.	31/05/2024
8	AIR QUALITY MONITORING AND PRESERVATION	Fume extraction system with bag filters shall be provided to system shall be provided to BF. dust suppression (DS) material handling area shall be provided. Adequate state be provided to rolling mill and other plants. DE & DS with dust collectors shall be provided to coke oven pla quenching shall also be done. Fugitive emissions shall monitored and records maintained.	ion (DE) system to rav ck height will system along nt. water

neral C	Conditions		
Sr.No.	Condition Type	Condition Details	
1	Noise Monitoring & Prevention	The overall noise level in and around the plant area well within the standards (85 dBA) by providing noise measures including acoustic hoods, silencers, enclosu sources of noise generation. The ambient noise levels to the standards prescribed under EPA rules 1989 viz (daytime) 70 dBA (nighttime)	e control res etc. on all should conforr
Noted, f		been done in all around the plant as a green belt to l monitoring report is attached as Annexure – III	Date: 31/05/2024
2	Human Health Environment	Occupational health surveillance of the workers sho regular basis and record maintained as per the factories	
	ubmission: Complied ally health checkup of the employees	is being carried out and records are maintained as per	Date: 31/05/2024
3	WATER QUALITY MONITORING AND PRESERVATION	The company shall develop surface water harvesting harvest the rain water for utilization in the lean seasor recharging the ground water table.	
All the r	ubmission: Agreed to Comply new buildings in upcoming project wil t the ground water.	l be having the feature of Rain water harvesting to	Date: 31/05/2024
4	Corporate Environmental Responsibility	The project proponent shall also comply with all the protection measures and safeguard recommended in the report. Further the company must undertake socio - experiment activities in the surroundings villages like development programmes, educational programmes of supply and health care etc.	he EIA & EMP conomic ce community
We shall	ubmission: Agreed to Comply l comply to this condition as committed or compliance.	ed in EIA/EMP. Presently plant is not in operation.	Date: 31/05/2024
5	Statutory compliance	The project authorities must strictly adhere to the strictly by the Chhattisgarh Environment Conservation Board state Government.	
	ubmission: Agreed to Comply or compliance.		Date: 31/05/2024

**PPs Submission:** Agreed to Comply Noted for compliance.

Date:

31/05/2024

As proposed, Rs. 125 crores and Rs. 25.00 Crores shall be earmarked towards capital cost and recurring cost /Annam for environmental protection measures to implement the conditions Corporate Environmental stipulated by Ministry of Environment & Forest as well as the state 7 Government. An implementation schedule for implementing all the Responsibility conditions stipulated herein shall be submitted to the Regional office of the ministry at Bhopal. The funds so provided shall not be diverted for any other purpose. Date: **PPs Submission:** Agreed to Comply 31/05/2024 Noted for compliance. Construction work for expansion units are yet to be started. The gaseous emission from various process shall conform to the load/mass based standards notified by this Ministry on 19th May,1993 and standards prescribed from time to time. The State Board may specify more stringent standards for the relevant AIR QUALITY parameters keeping in view the nature of the industry and its size and MONITORING AND 8 location. At no time the emission level shall go beyond the prescribe **PRESERVATION** standards. on-line continuous monitoring system shall be installed in stacks to monitor SPM and interlocking facilities shall be provided so that process can be automatically stopped in case emission level exceeds the limit. Date: **PPs Submission:** Agreed to Comply 31/05/2024 Noted for compliance. Construction work for expansion units are yet to be started. In plant control measures for checking fugitive emission from all the vulnerable sources like spillage/raw material/coal handling etc. shall be provided/Further, specific measures like provision of dust suppression system consisting of water sprinkling, suction hoods, fans and bag filters etc. shall be installed at material transfer points. AIR QUALITY Blast furnace stock house and other enclosed raw material handling MONITORING AND 9 areas. Centralized DE-dusting system i.e. collection of fugitive **PRESERVATION** emission through suction hood and subsequent treatment through bag filter or any other device and finally emitted through stack of appropriately designed height conforming to the standards for induction furnace existing in the industry and proposed induction and arc fugitive emission shall be monitored and record maintained. Date: **PPs Submission:** Agreed to Comply 31/05/2024 Noted for compliance. Construction work for expansion units are yet to be started. Presently plant is not in operation. At least four ambient air quality monitoring stations should be established in the downward direction as well as where maximum AIR QUALITY ground level concentration of SPM SO2 and Nox are anticipated in 10 MONITORING AND consultation with CECB. data on ambient air quality and stack **PRESERVATION** emission should be regularly submitted to this Ministry including its regional Office at Bhopal and the CECB/CPCB once in six months.

PPs Submission: Complied

We have established 4 nos. Ambient Air quality stations. Presently plant is not in operation. The monitoring results are attached as Annexure -I.

Date: 31/05/2024

WATER QUALITY
11 MONITORING AND
PRESERVATION

Industrial waste water shall be properly collected ,treated so as to conform to the standards prescribed under GSR 422 (E) dated 19 may,1993 and 31st December 1993 or as amended from time to time .The treated waste water shall be utilized for plantation purpose.
